

Synthetic Prompt Corpus (Unlabeled Sentiment)

This document was generated using synthetic data for early-stage experimentation. It contains one-sentence prompts with mixed sentiment. Sentiment is not labeled; downstream pipelines infer it. Prompts are intentionally minimal and consistent to support deterministic downstream transformations. Prompt rows are embedded as images.

Synthetic Prompt Corpus (Unlabeled Sentiment)

row_id	prompt
1	The tester says the feature works as expected and improves usability.
2	The client says the documentation looks clear and helps onboarding.
3	The auditor says access control is stronger and helps prevent escalation.
4	The partner says the portal opens quickly and closes sessions correctly.
5	The tester says the build runs consistently and stops failing randomly.
6	The customer says the release looks stable and feels smoother than before.
7	The customer says the support experience feels responsive and helps resolution.
8	The reviewer says the interface looks polished and improves clarity.
9	The reviewer says the navigation feels intuitive and helps discovery.
10	The reviewer says the UI feels cohesive and looks professional.
11	The partner says the portal opens quickly and closes sessions correctly.
12	The customer is pleased because response time drops after the fix.
13	The user says the new default works well and feels consistent.
14	The customer is pleased because response time drops after the fix.
15	The user says the product feels reliable and works well under load.
16	The auditor says access control is stronger and helps prevent escalation.
17	The engineer thinks the refactor improves reliability and changes little externally.
18	The reviewer says the interface looks polished and improves clarity.
19	The user says the new default works well and feels consistent.
20	The reviewer says the interface looks polished and improves clarity.
21	The reviewer says the navigation feels intuitive and helps discovery.

Synthetic Prompt Corpus (Unlabeled Sentiment)

row_id	prompt
22	The stakeholder believes the plan is solid and helps coordination.
23	The stakeholder believes the plan is solid and helps coordination.
24	The customer says the release looks stable and feels smoother than before.
25	The stakeholder says the roadmap looks clear and helps planning.
26	The tester says the feature works as expected and improves usability.
27	The reviewer says the UI feels cohesive and looks professional.
28	The customer says the checkout flow works smoothly and feels faster.
29	The team is relieved because the service is stable and drops fewer requests.
30	The partner says the portal opens quickly and closes sessions correctly.
31	The customer says the checkout flow works smoothly and feels faster.
32	The reviewer says the navigation feels intuitive and helps discovery.
33	The customer says the checkout flow works smoothly and feels faster.
34	The analyst says the report looks consistent and matches the source.
35	The analyst says the report looks consistent and matches the source.
36	The auditor says access control is stronger and helps prevent escalation.
37	The client says the documentation looks clear and helps onboarding.
38	The analyst says the report looks consistent and matches the source.
39	The auditor says access control is stronger and helps prevent escalation.
40	The team is relieved because the service is stable and drops fewer requests.
41	The user says the product feels reliable and works well under load.
42	The operator says the deployment process fails intermittently and stops pipelines.

Synthetic Prompt Corpus (Unlabeled Sentiment)

row_id	prompt
43	The engineer says the change improves performance and helps reduce latency.
44	The customer says the support experience feels responsive and helps resolution.
45	The customer is pleased because response time drops after the fix.
46	The stakeholder says the proposal looks solid and helps alignment.
47	The customer says the release looks stable and feels smoother than before.
48	The team is confident because the process improves quality and helps delivery.
49	The stakeholder believes the plan is solid and helps coordination.
50	The operator says the deploy process works smoothly and helps reduce downtime.
51	The partner says the portal opens quickly and closes sessions correctly.
52	The engineer says the change improves performance and helps reduce latency.
53	The team is confident because the process improves quality and helps delivery.
54	The client is satisfied because the integration works and adds value.
55	The tester says the build runs consistently and stops failing randomly.
56	The stakeholder says the roadmap looks clear and helps planning.
57	The client says the documentation looks clear and helps onboarding.
58	The team is confident because the process improves quality and helps delivery.
59	The operator says the deploy process works smoothly and helps reduce downtime.
60	The auditor says access control is stronger and helps prevent escalation.
61	The engineer says the integration works cleanly and helps delivery.
62	The team is confident because the process improves quality and helps delivery.
63	The team is confident because the process improves quality and helps delivery.

Synthetic Prompt Corpus (Unlabeled Sentiment)

row_id	prompt
64	The reviewer says the UI feels cohesive and looks professional.
65	The operator says the alerting setup works reliably and helps triage incidents.
66	The stakeholder says the proposal looks solid and helps alignment.
67	The tester says the build runs consistently and stops failing randomly.
68	The operator says the system starts cleanly and runs without alerts.
69	The tester says the build runs consistently and stops failing randomly.
70	The team is confident because the process improves quality and helps delivery.
71	The team is relieved because the service is stable and drops fewer requests.
72	The customer says the release looks stable and feels smoother than before.
73	The customer says the support experience feels responsive and helps resolution.
74	The customer is pleased because response time drops after the fix.
75	The user says the new default works well and feels consistent.
76	The tester says the build runs consistently and stops failing randomly.
77	The analyst says the report looks consistent and matches the source.
78	The team is relieved because the service is stable and drops fewer requests.
79	The engineer says the change improves performance and helps reduce latency.
80	The tester says the feature works as expected and improves usability.
81	The user says the new default works well and feels consistent.
82	The client says the documentation looks clear and helps onboarding.
83	The customer says the support experience feels responsive and helps resolution.
84	The customer says the checkout flow works smoothly and feels faster.
